## PROFESSIONAL SUMMARY

Results-driven Full-Stack Developer with 1.8+ years of experience building scalable web applications using Next.js, TypeScript, Node.js, and MongoDB. Hands-on experience integrating LLM-based assistants and Generative AI into production platforms. Familiar with RAG (Retrieval-Augmented Generation) architectures and MCP (Model Context Protocol) patterns for AI tool integrations. Proven track record of improving application performance — reduced API latency by 25% and page load time by 30%. Passionate about high-performance, ergonomic applications and eager to contribute to next-generation web experiences on platforms like xHighlight.

## PROJECTS

---

**AI Meeting-to-Marketing SaaS Platform** — *Next.js · TypeScript · MongoDB · OpenAI API · Generative AI*

- Engineered a Generative AI platform that converts meeting transcripts into structured marketing content (social posts, emails, briefs)
- Implemented context-aware content history to enable daily social media generation with brand consistency
- Integrated OpenAI API for NLP processing; built full authentication, dashboard, and content management system

**Agriculture Inventory Management System** — *Next.js · React · TypeScript · MongoDB · HTML · CSS*

- Developed a real-time inventory and transaction tracking system for agricultural businesses using Next.js and MongoDB
- Designed responsive dashboards for live analytics, stock management, and product reporting
- Implemented role-based access control (RBAC) for admin and staff users with secure authentication
